

CV of Invited Faculty

Sae Won Kim

Position	Director
Department, Affiliation	Clinical Science, ProGen Co., Ltd.
Major Field	Drug development (bispecific fusion proteins, cell and gene therapies)
Professional Activities: (Career or membership)	2023.09~: Adjunct Professor, Yonsei University, College of Medicine 2023.05~2023.10: Chief Business Officer, SL MetaGen, Inc. 2014.12~2023.10: Chief Scientist, SL BiGen, Inc.
Short Bio (in 150 words):	Dr. Kim is an accomplished immunologist with over 15 years of expertise in tumor immunology and cell-based immunotherapies. Specializing in the engineering and preclinical development of genetically modified NK cell therapies, Dr. Kim has been instrumental in advancing innovations in immune cell therapies. With over a decade of experience in the biotech industry, he has led research teams and driven transformative programs in CAR-NK cell therapy, supported by pivotal funding from the Korean government. Beyond research, Dr. Kim's expertise spans drug development, translational science, and licensing of immunotherapy platforms. Currently, as the head of the Clinical Science Team at ProGen, he leads preclinical-to-clinical translational efforts for cutting-edge therapies including PG-102, an innovative bispecific GLP-1R/GLP-2R agonist targeting obesity and type 2 diabetes. His multidisciplinary capabilities in business development, strategic planning, and program management ensure seamless alignment between research innovation and business objectives.
