

CV of Invited Faculty

Yukio TANIZAWA

Position	President
Department, Affiliation	Yamaguchi University
Major Field	Molecular and genetic pathophysiology of diabetes mellitus
Professional Activities: (Career or membership)	<p>The Japanese Society of Internal Medicine, Councilor</p> <p>The Japan Diabetes Society, Councilor, Executive Director</p> <p>The Japan Endocrine Society, Councilor</p> <p>The Asian Association for the Study of Diabetes, Executive Board Member</p> <p>American Diabetes Association</p> <p>European Association for the Study of Diabetes</p>
Short Bio (in 150 words):	<p>Yukio Tanizawa, MD, PhD, graduated from Yamaguchi University School of Medicine in 1983 and earned his PhD in 1987. After serving as a physician, he became assistant professor at the 3rd Department of Internal Medicine in 1989. From 1990 to 1993, he joined Professor Alan Permutt's lab at Washington University School of Medicine. Upon returning to Yamaguchi University, he was promoted to lecturer, and in 2002, he became Professor of Medicine. In 2016, Dr. Tanizawa was appointed Dean and Director of Yamaguchi University School of Medicine, later becoming Vice-President in 2020 and President in 2022.</p> <p>His research focuses on the molecular and genetic mechanisms of β-cell failure in diabetes mellitus, including the discovery of the gene for Wolfram Syndrome, characterized by insulin-dependent diabetes mellitus and optic atrophy, published in <i>Nature Genetics</i> in 1998. His work has appeared in prestigious journals, including <i>JCI</i>, <i>JCI insight</i>, <i>Diabetologia</i>, and <i>Science Translational Medicine</i>.</p>
